**Established**  
**ICS :** 67.230  
**National Ref :** NTA 8059:2016 Concept nl  
**Title :** Prerequisite programs on food safety for storage and distribution  
**Scope :** This document specifies requirements for establishing, implementing and maintaining prerequisite programs (PRPs) to assist in controlling food safety hazards. This document is applicable to all organizations, regardless of size or complexity, which are involved in the storage and distribution step of the food chain, that wish to implement PRPs in such a way as to address the requirements specified in Clause 7 of ISO 22000:2005. The document is neither designed nor intended for use in other parts of the food supply chain or in isolation. However, this document may be applied by other organizations willing to develop codes of practice and other types of supplier-buyer relationships based on ISO 22000:2005. Food storage and distribution operations are diverse in nature and not all of the requirements specified in this NTA apply to an individual establishment or process. Where exclusions are made or alternative measures implemented, these need to be justified by a risk assessment. Any exclusions or alternative measures adopted should not affect the ability of the organization to comply with these requirements.

**National Ref :** ÖNORM S 5223-2  
**Title :** Estimation of effective dose at planned exposition situations with natural radioactive material - Part 2: Dose evaluation  
**Scope :** This ÖNORM deals with the estimation of effective dose at planned exposition situations with natural radioactive material, especially in case of increased expositions through Rn-222, uranium or thorium and their secondary products (without radon). The calculation of the effective dose from measurement data is examined. This ÖNORM is for determining the dose at at planned exposition situations with natural radioactive material and shall be applied in operations from staff dealing self-dependently in fields with expected increased exposition through natural radioactive material.

**ICS :** 13.280, 73.020, 91.040.01  
**National Ref :** ÖNORM S 5280-1  
**Title :** Radon - Part 1: Metrological tasks and evaluation  
**Scope :** Radon and its secondary products exposes the general public to potential health risks. Comprehensive studies in Austria indicate an indoor average value of radon of 100 Bq/m<sup>3</sup>. The inhalation of radon causes about 40 % of the entire effective dose of the exposition sum of natural and simulated radiation sources. In this connection the present ÖNORM describes different metrological tasks, appropriate measuring methods and the evaluation of the results in regard to the standard value.

**ICS :** 13.100  
**National Ref :** UNI1601968  
**Title :** Adoption and effective implementation of the Organizational and Management Models (MOG) of health and safety - Asseveration procedure by Italian Joint Bodies  
**Scope :** Legislative Decree 81/2008 allows the asseveration of the adoption and effective implementation of the organizational and management models of health and safety at work as declined in art. 30 of same legislative decree, with the aim to prevent the crimes referred to the art. 25 septies of Legislative Decree 231/01.  
This option is left to the Joint Bodies constituted of associations of employers and workers between the most representative at national level.  
However, the law does not give a resolution about the kind of requirement or procedures for the asseveration activity, except for the one, declined in paragraph 3b of art. 51 of the Decree 81, according to which "for the purposes referred to paragraph 3- bis, the joint bodies establish specific joint commissions, technically competent".  
It is therefore useful and necessary a technical report that provides methods and tools for carrying out the verification activity of MOG implemented by companies with the aim to attest the effective actuation of the organizational and management models by the Joint Bodies.
