Subsector A06: BUILDING AND CONSTRUCTION SERVICES

Subsector : A06 **Registration Date :** 2022-11-24
Organization : ASI
Country : Austria
Project ID : 01000205/0001 **Project Established**
ICS : 91.140.30
National Ref : ÖNORM H 6020
Title : Ventilation and air conditioning plants for locations for medical use - Design, construction, operation, maintenance, technical and hygiene inspections
Scope : This Austrian Standard applies to ventilation and air conditioning systems and their components in buildings and rooms used for health and social purposes, where medical examinations, treatments and surgical interventions on persons are carried out. This includes Hospitals and other according to KAKuG (Krankenanstalten- und Kuranstaltengesetz) authorized institutions, i.e. dialysis centres, ambulatories, convalescent homes, sanatoriums, rehab hospitals and care facilities.

The scope of this ÖNORM also includes operation, maintenance as well as hygienic, technical and economic inspections of ventilation and air conditioning systems.

HVAC systems for pharmacies, for filling and manufacturing medicines as well as laboratories are not the subject of this ÖNORM.

Organization : ASI
Country : Austria
Project ID : 01000213/0001 **Project Established**
ICS : 91.100.15, 93.080.20
National Ref : ÖNORM B 3141
Title : Production of recycled building materials from excavated materials (mainly natural aggregates)
Scope : This ÖNORM summarises the construction and environmental requirements for recycled building materials from excavated materials.
It covers excavated materials that are processed into natural aggregates or mixtures of natural aggregates with recycled aggregates and are described in the Austrian Federal Waste Management Plan.
The environmental requirements are specified in the Austrian Federal Waste Management Plan.
The technical requirements for construction are taken from the European product standards and their national implementation documents and they are categorised.
Furthermore, this ÖNORM defines unique material designations for the manufactured recycled building materials.
Aggregate mixtures can be produced by adding recycled aggregates (in minor quantities) for technical improvement to the above-mentioned recycled building materials. Mixtures already present in situ are also covered by this ÖNORM.
Recycled building materials covered by the Austrian Recycling Building Materials Ordinance are dealt with in ÖNORM B 3140 and are therefore not part of this ÖNORM.

Organization : ASI
Country : Austria
Project ID : 01000214/0001 **Project Established**
ICS : 91.100.15, 93.080.20
National Ref : ÖNORM B 4810
Title : Test methods for mechanical and physical properties of aggregates - Frost susceptibility of mixtures for unbound bases for road and airfield construction
Scope : This ÖNORM describes the tests required to determine frost resistance in the context of assessing the quality of the fines content of mixtures of natural, industrially produced and recycled aggregates in the installed state for unbound lower and upper base courses in road and airport construction. 6.2 and Section 7 of this ÖNORM are not applicable to mixtures consisting entirely or partly of recycled construction materials that are not of natural origin and/or have been industrially modified (concrete, asphalt, brick chippings).
For special questions (e.g. general geological questions, landfill construction), the clay

mineral determination may also be carried out on other grain sizes.

Title :

Tree care - Terms and definitions

Scope :

This document defines terms used in a procurement and execution process for tree care, tree care services, tree maintenance and renewal of tree stocks.

This document covers terminology for:

- description of trees,
- features of trees,
- pruning and other orderable measures,
- tree inspection,
- conservation,
- risk assessment;
- injuries,
- measures.

Terminology for tree biology, soil work and nursery-related terms are not included.

Title :

Tree care —Protection of trees during construction — Part 1: Requirements for clients

Scope :

This document specifies requirements to protect trees during planning and construction projects by, among other things, taking trees into account already in the planning phase, ensuring that the right competence regarding trees is available and that communication is clear between the parties. The standard will include all parts from the planning process as well as technical solutions and maintenance measures.
